^{*}Dimensions are nominal measurements only.

Installation Instruction For Bath System Body Only

1.Fit off in-wall mixer body into wall structure, and ensure the installation depth is 51-66mm from the tile surface.

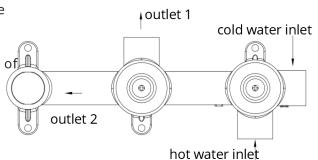

2.Connect hot, cold water lines. Test and check for leaks.

3.Install the plasterboard and make holes with diameters of Ø40, Ø45, Ø40, and Ø45.

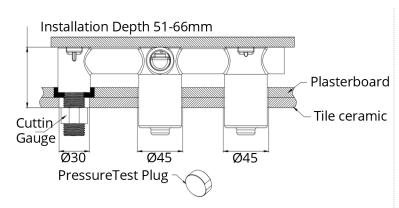

4.Apply waterproofing between the plasterboard and the mixer body (1) to prevent any potential leaks.

5.The in-wall mixer body installation is complete.

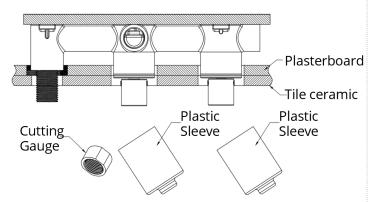

Check for leaks.

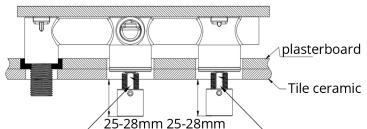

Installation Instruction For Bath SystemTrim Kits Only

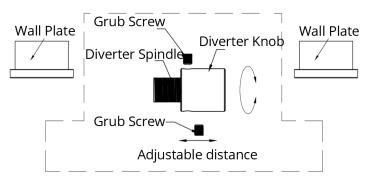

- 1. Install tiles and drill holes with diameters of Ø30, Ø45, Ø45.
- 2. Remove the pressure test plug.
- 3. Assemble the cutting gauge onto the mixer body, make it flush with the tile surface, and trim off any excess part after assembly.

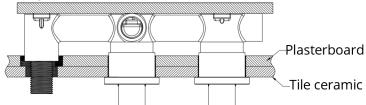

4. Remove the cutting gauge and protective sleeves.

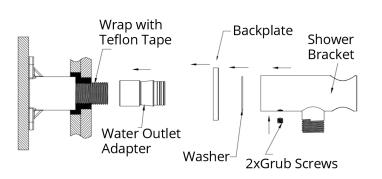

The grub screw needs to be tightened onto the surface.

5.Adjust the distance between the Diverter knob and the tile surface to 25-28mm as shown in the diagram. 6.Place the wall plate onto the mixer body.

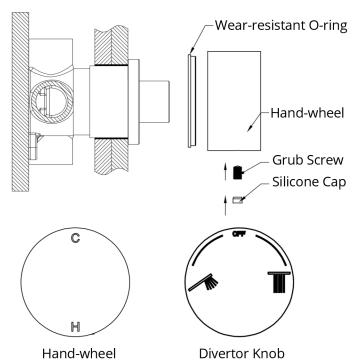

7.Apply waterproofing in the gap between the ceramic tile and the water outlet.

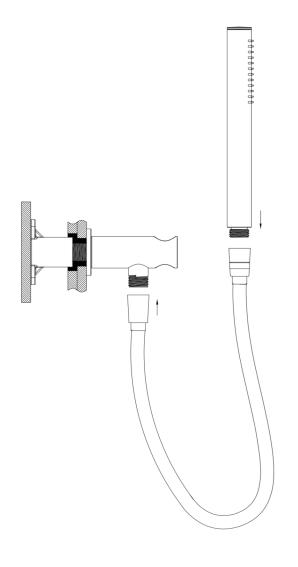

9.Assemble the Backplate, washer, and shower bracket onto the main body, then secure with screws.

Follow step 10 to install the Hand-wheel and the Diverter Knob

10.Attach the wear-resistant O-ring, hand-wheel/ Diverter knob, grub screw, and silicone cap, securing them in place.

Outlet 1
Cold Water Inlet
Hot Water Inlet

11.Attach the shower hose and hand shower, securing them in place.

12. Installation is now complete. Test for leaks.
